

KAI MEDICAL MICROSURGERY KNIFE

Founded in 1908 in Seki-shi, Gifu Prefecture, Japan, the KAI Group is a cuttery manufacturer with over 100 years of history. Based on the "Blacksmithing spirit" of making cools for everyday life with excellent craftsmanship, the company has continued to innovate with advanced factory facilities and improved production technologies.

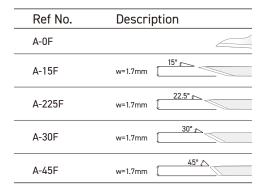

The KAI Group incorporates the "DUPS" concept in product development. The products have well-designed (Design), unique (Uniqueness), patent-worthy (Patents), safe (Safety) and fut or stories (Stories). Our goal is to create products that meet these criteria, and through our products we hope to create wonderful experiences and enjoyable moments for our customers. Today, we offer more than 10,000 products, ranging from kitchenware, confectionery, beauty care products (household items) to professional cutlery and medical products.

We will continue to strive to make our products an integral part of the daily lives of people around the world, taking into account the materials they are made from and the environmental impact of their disposal.

In the field of medical products, we use the technology we have developed in the production of razors and the other unique technology we have upgraded over the years to manufacture blades and instruments for use in ophthalmology, surgery and dermatology. By improving the quality of our blades, we strive to improve the safety of the medical treatment and the quality of life (QoL) of patients around the world.

STAB KNIVES Cataract Surgery -

Our Stab Knife is made using the technology we have refined over the years in the manufacture of razor blades. Three bevel edge of the blade tip enables the smooth penetration and consistent sharpness.

Stab 15°

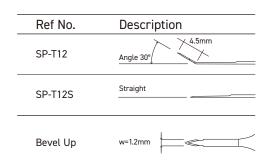

SIDEPORT KNIVES Cataract Surgery - Side port SIDEPORT KNIFE STRAIGHT

~~~~	and the second	Sideport Straight
Ref No.           SP-S15           SP-S15-W07           SP-S30	Description           w=1.0mm         15°           w=1.0mm         30°	Sideport Straight         Three bevel edge of the blade tip enables the smooth penetration and consistent sharpness. Stable 1.0mm or smaller sideport incision can be created. Sideport Knife Straight brings the same feeling of use as the stab knife. $1$ $2$ $2$ $3$
SP-S30-W06		Close Shape to the Ordinal Stab Knives         • The same operational way of the ordinary stab knife is applied.         • Making Stable Incision for Side Port         • Enables to make stable incision of maximum 1.0mm width.
SIDEPORT KN		Sideport Utility
Ref No. SP-U10	Description Angle 45°	Stable Incision with Short Penetration • The angle is made closer from the tip (SP-U10) and the length from the tip is 4.0mm, which enables to make stable incision of 1.0mm width even shorter penetration than MVR (VK-20GF) / stab knife (A-15F).
SP-U10S Bevel Up	Straight	The required insert distance when creating 1mm wide port.  1.0mm anterior chamber cornea SP-U10 VK-20GF A-15F
		<ul> <li>45 degree angled blade enables the penetration from upper/ temporal/ nasal direction. Easy in making a stable incision even with a retractor for</li> </ul>

- nasal direction. Easy in making a stable incision even with a retractor for microcornea eyes.
- ${\boldsymbol{\cdot}}$  Better selection for surgeons who prefer symmetric shape of the blade.

### SIDEPORT KNIFE TRAPEZOID

#### Trapezoidal Blade Shape

• Trapezoidal incision makes it easier to move surgical

Sideport Trapezoid

- instrument, and makes perfusion leak less. • Enable to make the required incision size (external
- and internal valve) by the depth of penetration.

#### **Better Operability**

- Compact head and angled at 30 degree (SP-T12). • Enables the ideal angle penetration to deep set eyes
- or narrow palpebral fissures.
- The incision width is enlarged by the sufficient length of the cutting edge on both sides.

#### Suitable for the Eyes with Shallow Anterior Chamber ·Trapezoidal incision is possible with short penetra-

- - A-15F

### SIDEPORT KNIFE ASYMMETRY

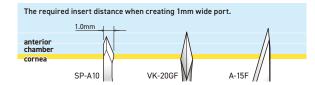

Ref No.	Description
SP-A10	Angle 45°
SP-A10S	Straight
Bevel Up	w=1.0mm

#### Stable Incision with Short Penetration

tion, compared to stab knife(A-15F). • Minimize the risk of damaging nucleus.

• The angle is made closer from the tip and the length from the tip is 4.0mm, which enables to make stable incision of 1.0mm width even shorter penetration than MVR (VK-20GF) / stab knife (A-15F).

SP-A10

•45 degree angled blade enables the penetration from upper/ temporal/ nasal direction. Easy in making a stable incision even with a retractor for microcornea eyes.

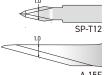

• Better selection for surgeons who prefer symmetric shape of the blade.

Cataract Surgery - Main port incision, Anterior Chamber Entry - Corneal Incision

Ref No.	Description
SLT-24	w=2.4mm
SLT-265	w=2.65mm
SLT-28	w=2.8mm
SLT-30	w=3.0mm
Double Bevel	Angle 45° 45°

- Knife Shape Specializing in Clear Corneal Incision Ideal dome-shaped incision can be made by simply moving the
- knife straight and in parallel along the iris.
- · Benefits of a Dome-Shaped Incision
  - The dome can serve as a strong valve and create a better self-sealing incision for clear corneal incision.

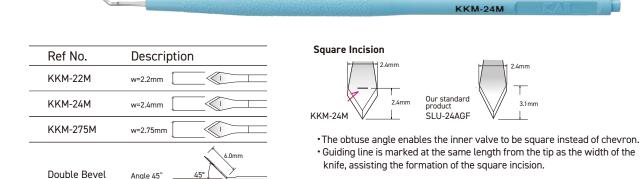

SLT-28

Cataract Surgery - Main port incision, Anterior Chamber Entry - Transconjunctival Single-Plane Sclerocorneal Incision

**Ideal Incision Tract** 

• Double bevel edge with the gradual grinding width at the back side bevel. · Easier in making "upward" incision following the curve of cornea till the knife reaches the corneal stroma.

**KKM-24M** 

2.4mm

3.1mm

• Easier in cutting forward in parallel with the iris (slightly upward) when penetrating into the anterior chamber.

Bleb Knife Bent 1.0

Reconstruction of Bleb in Glaucoma Surgery

## Bevel Up Description Ref No. BKB2-10AGF 45° Angle 45°

Application : Needling, Bleb reconstruction and Pterygium Blade Width : 1.0mm (max.) Material : Stainless steel plate

The tip of Bleb Knife is designed to be circular and its maximum blade width is

These enable to cover the disadvantage of needling by the injection needle and minimize the expansion of incision port as small as possible. In addition, Bleb Knife enables to separate the subconjunctival scar tissue without damaging the conjunctiva during reconstruction of the bleb for the eye whose filtering bleb has failed. The application cases of bleb knife are

#### **BLEB KNIFE II -Bent Type**

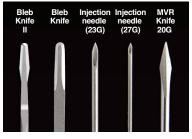

Application : Needling and Bleb reconstruction Blade Length : 2.6mm Blade Width : 1.0mm (max.) Material : Stainless steel rod

The blade length is shorten to 2.6mm and rod material is used to make the root of the blade more round and thinner in order to minimize the expansion of incision port.

#### Reconstruction of Bleb (BKB-10AGF)

**Removing Pterygium (BKB-10AGF)**

45°

Angle  $45^{\circ}$  _

45° [

Double Bevel

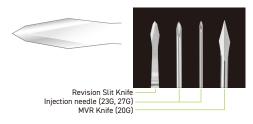

#### Sharp Edged Blade with Shorter Handle

• The sharp edge enables penetrating to the tissue without conjunctiva incision by the scissors.

• 111mm length handle enables better operability even under the slit lamp.

• Grinding the sides of the blade enables easier dissection of hard scar tissue than the needles.

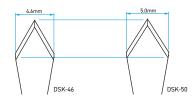

### DSAEK KNIVES -DSAEK (Descemet's Stripping Automated Endothelial Keratoplasty)

			DSAEK 4.6
Ref No.	Description	Blade Bevel	
DSK-46	w=4.6mm		Bevel Up
DSK-50	w=5.0mm		Double Bevel

#### Sharp Cutting Edge

• Double bevel edge enables sharp cutting performance and creates optimal incision for DSAEK by one penetration.

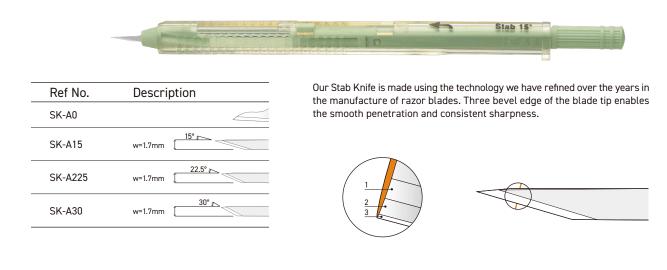

Optimum Blade Shape Designed on Corneal Diameter • Equivalent length from the tip to the blade's widest part prevents deeper penetration.

## SAFETY KNIVES - For your safety from accidental injury

Exclusively designed to prevent cut injury accident during surgeries.

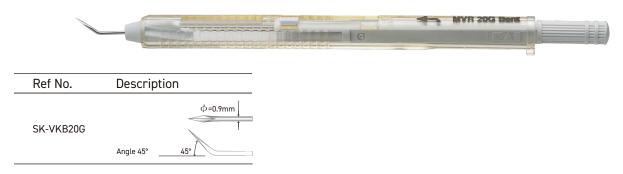

Recognizing the growing concerns on cut injury accident during surgery and increasing awareness for the safety, KAI designed and developed the ophthalmic knife with unique safety system. Covering sharp blade by two handed operation system, the knife can avoid careless cut injury accident as little as possible. To strive for the user friendly as well as the safety, KAI realized this safety type knife with the same visibility during surgeries. KAI dedicates all efforts to the sharpness for patients and safety for the health care professions.

### Product list - Safety type

Application	Description	Ref No.	Blade width	Bevel	Straight or Angled	Indication (line, dot)	Material (Plate/Rod)	Page No.
	SAFETY STAB KNIVES							
Cataract Surgery - Side port - Lamellar Scleral Dissection	Safety stab knife 0°	SK-A0	1.7mm	-	Straight	-	Plate	
	Safety stab knife 15°	SK-A15	1.7mm	-	Straight	-	Plate	
	Safety stab knife 22.5°	SK-A225	1.7mm	-	Straight	-	Plate	
	Safety stab knife 30°	SK-A30	1.7mm	-	Straight	-	Plate	
Cataract Surgery - Side port	SAFETY MVR KNIFE							
Vitreoretinal Surgery - Scleral Incision	Safety MVR knife 20 Gauge, Dia. 0.9mm	SK-VKB20G	20 Gauge	-	Angled 45°	-	Rod	
	SAFETY CRESCENT KNIVES							
Cataract Surgery	Safety crescent knife 1.6mm	SK-CPU16	1.6mm	Bevel Up	Angled 45°	-	Plate	
- Scleral Tunnel	Safety crescent knife 2.2mm	SK-CPU22	2.2mm	Bevel Up	Angled 45°	-	Plate	
	Safety crescent knife 2.6mm	SK-CPU26	2.6mm	Bevel Up	Angled 45°	-	Plate	
	SAFETY CLEAR CORNEAL KNIVES							
	Safety clear corneal knife 1.8mm	SK-CCR18M	1.8mm	Double Bevel	Angled 45°	One line	Rod	
	Safety clear corneal knife 2.0mm	SK-CCR20M	2.0mm	Double Bevel	Angled 45°	One line	Rod	
	Safety clear corneal knife 2.2mm	SK-CCR22	2.2mm	Double Bevel	Angled 45°	-	Rod	
	Safety clear corneal knife 2.3mm	SK-CCR23	2.3mm	Double Bevel	Angled 45°	-	Rod	
	Safety clear corneal knife 2.4mm	SK-CCR24	2.4mm	Double Bevel	Angled 45°	-	Rod	
	Safety clear corneal knife 2.8mm	SK-CCR28	2.8mm	Double Bevel	Angled 45°	-	Rod	
	Safety clear corneal knife 3.0mm	SK-CCR30	3.0mm	Double Bevel	Angled 45°	-	Rod	
Cataract Surgery	Safety clear corneal knife 3.2mm	SK-CCR32	3.2mm	Double Bevel	Angled 45°	-	Rod	13
- Main port incision	SAFETY SLIT KNIVES							
	Safety slit knife 1.8mm	SK-SLU18M	1.8mm	Bevel Up	Angled 45°	One line	Plate	
	Safety slit knife 2.0mm	SK-SLU20M	2.0mm	Bevel Up	Angled 45°	One line	Plate	
	Safety slit knife 2.2mm	SK-SLU22	2.2mm	Bevel Up	Angled 45°	-	Plate	
	Safety slit knife 2.3mm	SK-SLU23	2.3mm	Bevel Up	Angled 45°	-	Plate	
	Safety slit knife 2.4mm	SK-SLU24	2.4mm	Bevel Up	Angled 45°	-	Plate	
	Safety slit knife 2.8mm	SK-SLU28	2.8mm	Bevel Up	Angled 45°	-	Plate	
	Safety slit knife 3.0mm	SK-SLU30	3.0mm	Bevel Up	Angled 45°	-	Plate	
	Safety slit knife 3.2mm	SK-SLU32	3.2mm	Bevel Up	Angled 45°	-	Plate	

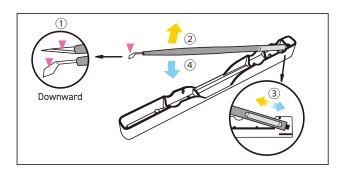

### Regular Type

Sterile and ready to use Each knife in a protection tray 5 pieces per dispenser box GS1-128 bar-code

#### Case removal and storage

Lift the handle (2) to remove. To store, insert the back of the handle into the case with the blade tip facing down (1) and 3) and put the handle back in the case (4).

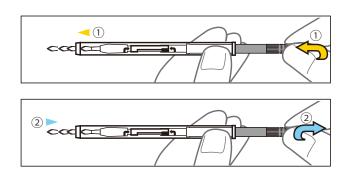

### Safety Type

Sterile and ready to use Blade covered with protective sheath 5 pieces per dispenser box GS1-128 bar-code

#### Exposing and Retracing Safety Knife

Rotate the slider clockwise to extend and retract the blade ( $\bigcirc$  and  $\bigcirc$ ).
